

The Tongue: Is it the CEO of the Body?

We always knew that the tongue had a mind of its own – now we can discuss the muscle organs mission to the human body. This organ interacts and controls the six systems of the human body, how is it that ADD/ADHD is involved. How can tether tissue cause so much trouble in a human life? What we didn't know, but we know now. This course is going to open your eyes to this CEO in the body you didn't know existed. This muscle organ of the mouth deserves new respect and understanding. New literature backs-up information. Discuss this information with your patients – it's amazing! Bring your questions – how does this CEO work? Hands-on interactive course.
